

**Own 1.000 m2 storage space at Schiphol Airport
& Skal Bio Control Certificated**

Airfreight for Perishables

Around-The-Clock Care

As long as goods are carried by air perishable goods were among the first commodities to be shipped this way. Fruits, vegetables and flowers must be handled with particular care. With years of experience DL Logistics Group knows what is asked. Which means we can delivery on short terms, with the highest reliability and the fastest handling for chilled and frozen products.

Why choose DL Air?

DL's air freight service offer door to door logistics solutions.

Our service qualifies as a 24-hour service, with a worldwide network, excellent information, keen pricing and – most importantly – employees who approach air freight of perishables as an interesting challenge with no boundaries.

Expertise and dedication

DL Freight Management (Amsterdam) BV focuses particularly on serving intercontinental shipping sectors where logistics is even more crucial than in other sectors.

For perishables we include in our service:

- Value added services such as palletization and re-packing
- Flexible use of airlines
- Quality and temperature control
- Proactive tracking and tracing
- Product specific air freight solutions
- Customs and tax settlements
- Certification according to SKAL and BRC
