Douane

First aid

55.000 m² bonded storage space for dry goods,
chilled and deep-frozen products and dangerous goods

Bonded Warehousing

Flexible and unlimited storage

Import and export declarations must be filed if goods are forwarded from one non-EU country to another or from a non-EU country to an EU country and vice versa. Our customs professionals accompany you with our services through the complete import and export clearance process.

Bonded warehousing

Goods coming from outside the European Community are normally termed non-community goods, which means they have to comply with customs formalities. If your goods subsequently need to be transported again, we are authorized to make them community-compliant or to transport them accompanied by a new T1 document.

Advantages of bonded warehousing

- If your goods are transported to countries outside the EU, you do not have to pay custom duties.
- If you need to store goods for a while and then later import them to the EU, you can postpone payment of custom duties and VAT.
- Customs inspections and control will be reduced.

Fiscal Representation

DL is offering the option to act as Fiscal representation. This is an attractive option for companies that are not VAT registered in the country of the first point of entry into the EU. The fiscal representative takes over all duties with regard to VAT, customs and INTRASTAT filing. You can enter the EU market as a foreign company without worrying about customs, statistics and VAT

Facts & figures

- Operating Monday to Friday from 08.00 to 18.00
- AEO Customs & Security Certificated
- 24/7 standby
- 55.000 m² bonded storage space for dry goods, chilled and deep-frozen products
